Boards of Trade Rally at Waterton Lakes Park

Get-Together Banquet and Dance at Prince of Wales Hotel Draws Large Number

Over 150 delegates and their ladies met at the Prince of Wales hotel yesterday, giving an auspicious send off to the opening of the season at this beautiful mountain resort, and President Dilatash and Secretary Haug of Waterton Board of Trade were warmly congratulated on the success of their efforts to popularize this resort among the people of Southern Alberta.

Delegates attended from Lethbridge and every town west to Coleman and south to the boundary, each member being introduced at the banquet by the presidents of their respective boards. Lethbridge and Cardston sent big delegations, while from the Pass, Blairmore was represented by seven members headed by President Lance Morgan, including J. E. Gillis, C. J. Thompson, S. G. Bannan, W. H. Chapell, Sergeant Jones, Walter Scott. Coleman was represented by O. E. S. Whiteside, chairman of the parks committee; W. L. Rippon, secretary, and H. T. Halliwell, president.

From Calgary Mr. Andrew Halkett, general superintendent of C. P. R. lines in Alberta, with Mrs. Halkett, was present and addressed the gathering. A very fine program of vocal and instrumental music by visiting artists from Cardston, Pincher Creek and Waterton Lakes interspersed the addresses, and the big dining room was a brilliant scene of gaiety and animation, despite the dashing of the spray and the hurricane wind which swept down the lakes.

Delegates were highly pleased with the warmth of the welcome extended, and many expressed the wish that meetings of this nature be held more frequently at the resort. Dancing followed the banquet, to the strains of entrancing music from the hotel orchestra.

In spite of the weather, it was a wonderful day in "Wonderful Waterton."

Championship Boxing Exhibition July 1 in Opera House

Frank Barringham is arranging a boxing exhibition for July 1 in the Opera House, Coleman, between Kid Hughes of Michel and Jimmy Burrell of Blairmore, for the junior welter-weight championship. They have not met before, and will box at 140 lbs. Further details next week.

Lower Wages Will Not Solve Problems States Moore

OTTAWA, Ont., June 12.—(By the Canadian Press)—"While organized labor is always ready and willing to co-operate with the employers in an endeavor to reach stability in industry, little approval can be given to Sir Joseph Flavelle's suggestion for a readjustment of wages," declared Tom Moore, president of the Trades and Labor Congress of Canada here today, when invited to comment on the Toronto dispatch reporting Sir Joseph's address to the Canadian Credit Men's Association.

"Organized labor is convinced that wage reductions present no solution to the problem. This, as a matter of fact, is more likely to bring about an accentuation of unemployment by reason of the reduced purchasing power."

"We are upheld in this by many experts in the financial and industrial field," said Mr. Moore. "Past experience has shown that wage reductions offer no solution to the problem."

Joe Kapalka Strikes 'Em Out

Coleman Ball Team Going Strong in Matches With Pass Towns

Coleman proved its superiority over Hillcrest baseball team by defeating them in two games out of three in a series concluding on Monday night, when Coleman won by a score of 8-1.

Joe Kapalka, wonder pitcher for Coleman, had 14 strike-outs to his credit. Slim Price of Hillcrest gave a good exhibition in the pitcher's box for Hillcrest.

The games between the teams of the Pass towns are awakening renewed interest in baseball, and the boys are being favored with good crowds, though the collection is small.

International Coal Co. donated to Coleman team a load of planks for repair work on the baseball field, for which they requested The Journal to express their appreciation.

United Church

In connection with the United Church, a camp for girls 12 to 17 years will be held 11 miles west of Macleod from July 2 to 11; for boys 12 to 17 years, July 13 to 20, and young people's camp for those 18 years and over, July 21 to 28.

Services on Sunday 11 a.m. and 7 p.m. Sunday school 10 a.m. —Rev. A. E. Larke, minister.

Coleman Homing Club

This week's flight of pigeons of Coleman Homing Club was from Great Falls, Montana, air line distance 210 miles.

Times of birds arriving was as follows, released at 6 a.m., first arriving at Coleman 11.16 a.m.

	yards per minute
W. Roushead	1182 14
W. Pryde	1179 10
J. Sudworth	1178 06
C. Makin	1168 48
J. Anderson	1164 00

The prizes for first and second were a ham donated by N. Bortnick, and a pair of candle sticks by G. R. Powell.

Coleman Wins Tennis Games at Cranbrook

Coleman tennis club played at Cranbrook on Sunday. The results were as follows:

Men's singles—Balloch won by default against Fergie of Cranbrook; Creagan of Coleman won against Dr. Fergie, who sprained his ankle; R. Jones won against Cranbrook player.

Men's doubles—Games won by Balloch and Lindoe and Barnes and Shone of Coleman.

Mixed doubles—Mrs. Lindoe and W. Balloch and Mrs. Borden and R. Jones, both games won by Coleman.

Ladies doubles—Mrs. Borden and E. Wilson played in two games, which were won by Cranbrook.

In the ladies singles Mrs. Borden and E. Wilson each played, both games being won by Cranbrook. Names of Cranbrook players were not turned in with the official scores.

Heavy Hailstorm

The heavy hailstorm on Tuesday afternoon flooded some premises in town. The town hall basement was flooded; W. L. Rippon's lawn and garden were ruined by water running from Fourth street across his premises, and other places report damage by water. The bill leading to Sixth street was strewn with gravel, and the creek was carrying an added volume of muddy water from the mountains. Half an hour later it was difficult to discern traces of the storm, except where damage was caused. The electric transmission line was put out of business locally for some time following the storm.

ST. ALBAN'S CHURCH

Next Sunday, the third after Trinity, the services will be: 9:30 a.m., Sunday School. 1:30 p.m., Bible Class. 7 p.m., Evensong and Sermon.

A Strawberry Tea

Will be held by the Choir of St. Alban's church, in the Rectory, on Saturday, June 20th, from 3 till 6 p.m. You are cordially invited. Admission 25c.

"Early to Rise He Worked Like H.... and Advertised"

Harvey S. Firestone makes automobile tires, and shows that his company for the first six months of its fiscal year made \$2,908,553.20, as against \$1,541,034 for the fiscal year ending October 1, 1930.

Manufacturers and business men interested in this cheerful news need not be puzzled by it. Mr. Firestone has been working harder than ever at his own business, and advertising more energetically than ever.

Produce the goods, then let the word know, through advertising, that you have them and, like Napoleon, you can "make circumstances."

Local News Items

Mr. and Mrs. T. Beddington of Saunders Creek, with their children, have been spending a few weeks here visiting with Mr. W. Machin.

Among the visitors to Waterton Lakes from Coleman over the week end were Mr. and Mrs. Frank Graham and Miss Yall, and Mr. and Mrs. W. L. Rippon.

Mr. and Mrs. Hoggan, and Mr. and Mrs. J. Rogers, with Mrs. Rogers, sr., were visitors with friends at Brocket on Sunday.

Rev. A. S. Partington and family spent the week end at Waterton Lakes, Mr. Partington holding service in the Anglican church there. In his place at St. Alban's, Mr. D. Hoyle read the service on Sunday morning.

St. Alban's Sunday school picnic will unite with St. Luke's, Blairmore, on Wednesday, July 15 at Lee Lake, and committees have been appointed to arrange transportation, finance and refreshments.

Miss Jean Hughes has returned from University Hospital, Edmonton, where she has completed six months training, and has been granted sick leave for a few months. She hopes that following a rest she will be able to resume her training course.

One morning we telephoned six parties, business and residence telephones. In three no reply was received, in two others it took almost a minute before they replied, in the remaining one the party answering couldn't speak English. We began to think a telephone was merely a delusion and a snare.

With so many men riding freight trains, accidents are frequent, and quite a number have met tragic ends or serious injuries in steaming rides. The men are kept moving by the authorities, yet many cannot find work and it is only by the odd time or quarter from kindly disposed people that they keep from starving.

Red Tub Tea Room, Lundbreck, again announces its summer service to the people of the Pass towns. This popular rendezvous makes a very nice break in an evening or afternoon drive, and is in charge of Mrs. Carwell. It is not more than 45 minutes easy drive from Coleman, and you'll enjoy a visit to this popular tea room and refreshment parlor.

The wise business man will work harder and use his initiative in maintaining business. You've got to be up and doing, for people do not come into a store simply because the door is open. The busy man does things. The others will tell you they haven't time. Their activity is very limited and confined to their personal interests.

Hoboes continue to travel the freight east and west. The continual search for work keeps them on the move. One old fellow on Sunday drifted into town, who could hardly be classed among the hoboes, though he was forced to beg for money to enable him to reach his home in Keremeos, B. C. He was receiving an old-age pension of \$20 per month and had become stranded on his return from a trip to Saskatchewan.

A joint meeting of the men of St. Luke's and St. Alban's congregations was held last Wednesday at Blairmore, and the Blairmore contingent challenged the Coleman men to a cribbage tournament to be played at Coleman on a date to be fixed in September. The losers will pay for a chicken supper. There will be some diligent practice in the meantime, as some have forgotten how to play crib. W. Poxton replied to Harry Griebach with a challenge to a checker tournament later in the season.

Readjustment Coming Says Sir Joseph Flavelle

TORONTO, Ont., June 12.—"If a readjustment of wages and salaries is obvious and natural, then however delayed by opposition, it will come about; all the King's horses and all the King's men, all the organizations concerned, of whatever sort, however powerfully entrenched, cannot in position do more than delay the necessary readjustment," said Sir Joseph Flavelle, Canadian merchant prince, addressing the Canadian Credit Men's Trust Association at their annual banquet Thursday night.

Local News

Mrs. J. S. Rogers of Nelson, B.C., is visiting her daughter, Mrs. W. Hoggan.

Coleman Caledonian Society will hold a picnic at Crows Nest Lake on Dominion Day, July 1.

Rev. and Mrs. A. E. Larke and Miss Margaret Halliwell are staying in the Emmerson cottage at Crows Nest Lake.

Mr. and Mrs. Norman Smith of Lethbridge visited on Sunday with Mrs. Smith's parents, Mr. and Mrs. J. Derbyshire. Several years ago Mr. Smith was on the Bank of Commerce staff here.

Confidence is the malleable of business, confidence in your own ability to see things through, and also the creating of the confidence of the general public in your dealings with them.

Two big cod fish caught this week since the opening of the fishing season on Monday was by a member of Coleman Rod & Gun Club, being a bull trout of 9 lb 14 oz. It is reported there were more fish caught at the lake at the Frank slide on Monday than at North Fork. Andrew Dow caught a 13 lb trout at Lundbreck Falls.

Christianity vs. Communism Burning Issue

Minister Hark Challenge to Atheistic Teachings of Communism—Urges Men to Stand Fast in Support of Christian Principles.

"Communism or Christianity, Karl Marx or Jesus Christ?"—was the subject of a challenging sermon by the Rev. A. E. Larke in St. Paul's church on Sunday. The church is at the cross roads, and many are trying to tear it down, while others by indifference or half-hearted support of Christianity are not making any effort to combat the influence of Communistic atheism.

"We are facing the alternatives between Atheism and Christianity? If so, why are there not more people attending church services. The next few years will experience the impact of Communism, and the church must be ready to fight it, or victory for Communism is assured."

"Social life to day does not appear to be dominated by a desire to build up homes and real friendship, or the development of a spiritual atmosphere. Mothers, fathers and young people should become enthused for Christianity, and this alternative must be embraced if Christianity is to reign supreme."

"Men here have been apathetic and indifferent, until those of us who are Christian have obtained control of the local union; yet still they stood by waiting for something to happen. The indifferent man do not see that Christianity must be upheld in the light of Communism against Jesus Christ."

"We must take Jesus and pay the price; we must show in our lives that we are applying the teachings of Jesus in dealing with this menace."

"Is the church working as actively as the Communists to place (Continued on Page Eight)

The Spirit Of Adventure

Sir Edward Grigg, Governor of Kenya, one of Britain's East African dependencies, who is at present on furlough in England, recently delivered an interesting address in which he noted a decline in the old British sense of adventure and made an appeal for a re-kindling of this spirit in the new generation. Without it, he held, the new generation would not be the equals of their fathers, grandfathers and great-grandfathers—those three generations that, practically within the reign of Queen Victoria, had built up the Empire as we know it today.

Decline in this sense of adventure Sir Edward attributed to the nervous depression produced by the Great War, and he urged that a revival of it would tend to promote support at home for development enterprises, and that this would keep Britain and the Empire strong.

It may be that Sir Edward is right and that the old roving spirit which sent Englishmen, Irishmen and Scotsmen into all the nooks and corners of the world, civilized and uncivilized, and which in years gone by brought Canada, India, a large portion of Africa, and many of the isles of the seven seas under the Union Jack, is not the impelling force it once was in the lives of British youth. But, on the other hand, it is not possibly true that the sense of spirit exists but in the changed conditions of the world of today it is merely finding other avenues of expression?

Tens of thousands of young men enlisted in the Great War purely in a spirit of adventure and Sir Edward is no doubt right that in that grim struggle they became disillusioned and a sense of depression followed on the heels of exhilaration. Again, thousands of the most daring spirits among the young men of this generation gave their lives in that great adventure, men who today would otherwise be found following in the footsteps of their sires and grandfathers.

But is not youth today much as it has always been? Before the Great War many people entertained the opinion that mankind had become soft, that it could not bear the sufferings and sustain the hardships accepted by former generations as inseparable from existence. The stamina displayed in the Great War demonstrated, to the amazement of all, how erroneous were all such ideas.

Is the spirit of adventure dead, or even on the decline? The attempt of Sir Hubert Wilkins and his companions, upon which they are now embarked, to make a dash in a submarine under the ice fields of the Arctic constitutes an adventure more daring than any that excited the imagination of a Jules Verne.

Or consider the recent adventure of Professor Piccard, and his assistant Charles Kipfer, who in a hermetically sealed aluminum ball attached to a balloon soared over 52,000 feet, almost ten miles, into the air, into that rarified stratosphere where winds do not blow, nor clouds form, but where the stars shine by day.

Then let us recall our own daring Canadian aviators who carried out the observation patrols along Hudson Straits to determine the ice conditions and navigability of that route, or who month in and month out maintain the forest fire patrols throughout our northlands, or are engaged in mapping unknown portions of Canada from the air.

All over the world daring and adventurous Britshers, including young Canadians, are engaged in engineering enterprises, building huge bridges, dams, hydro-electric plants, railways, amid jungles and in almost inaccessible places with the same zest and enthusiasm which carried their forebears into the unexplored regions of a by-gone past.

Canada this year celebrates the fiftieth anniversary of the commencement of the Canadian Pacific Railway—a great adventure—followed by a still greater adventure on the part of the thousands of men and women who in a few short years settled and transformed the prairies of Western Canada into great wheat producing provinces now inhabited by over two million people.

No, the sense of adventure is not dead; we doubt if it is even on the decline. For example, give a thought to the daily adventurings in the realms of science and invention where patient and courageous souls are discovering more wonderful things than ever did the romantic discoverers and explorers of the past.

Today the sense of adventure is very much alive, but it manifests itself in new ways and in different channels in keeping with the changed conditions of a scientific and machinery age as contrasted with those which preceded the age of steam and electricity. That is all, and there is no ground for pessimism that the British race is losing its determination and grit.

Insanity Increases

Stock Market Losses Are Held Responsible By Mental Hospital Authority Of Quebec

Stock market losses were blamed for an increase in the number of the insane during a discussion at the American Psychiatric Association Convention at Toronto by Dr. A. H. Desloges, director of mental hospitals for the province of Quebec.

The increase of insanity in his province for the past year was 14 per cent. of the total number of cases as compared with the previous year's increase of five and a half per cent, said Dr. Desloges, and he attributed the disparity to the loss of savings by uninitiated investors. He urged government protection for the latter as a step in mental health.

Today's Fish Story

When an English sheep dog was chased by a 44-inch muskellunge, while swimming in the Rideau River, at Ottawa, the dog bit for shore. So did the fish. Mr. Fish became stranded in shallow water where a boulder was thrown killing it. The fish weighed 23 pounds.

A doctor is the only man who can suffer from good health.

Improved Method For Surveying From Air

Described By Chief Of British Topographical Survey

A new and improved method of aerial survey was described to the Royal Society of Canada by Brig.-Gen. Sir Charles Delme-Radcliffe, chief of the British cadastral and topographical survey. Originally developed in Italy, this method, said Sir Charles, was as rapid as stereoscopic surveying by air and as accurate as the old-fashioned transit survey. The photogrammetric method, which has not yet been used in Canada, is based on a series of photographs from the air, each of which overlaps the next picture by 66 per cent. It is regarded as a great improvement over surveying methods now in use.

Artificial Leather

Artificial leather is now made of wool in England. The product is said to look much like real leather and have durable qualities and be capable of being substituted for leather in many places.

An automatic timing device for telephones has been developed which accurately times the length of conversations.

Suffered From Heart Trouble Became Weak and Run Down

Mrs. Wm. Dittie, Gienensfield, Ont., writes: "For a long period I suffered from heart trouble, and became very weak and run down. I tried various remedies, but they did me no good. One day I met a friend and told her of my trouble. She said she had heart trouble for two years too, but after using Milburn's Heart and Nerve Pills for a few days she had been relieved of her trouble, so I got two boxes and after taking them I was again feeling fine and always recommending the pills to anyone complaining of heart trouble."

Seeking Record In Flight Around World

Youths Expect To Make Trip In Ten Days

Wiley Post and Harold Gatty, two prudent young men, have figured out the comparative hazards of flying around the world and trying to cross a busy street—and they've decided to fly around the world.

"We got an expert to look over our motor," said Post at the Hotel Baitmore, New York. "Then we figured our chances. We found we had something like 3½ chances of getting hit by an automobile for every one chance that the motor would stop when it wasn't supposed to. "No, we're not afraid. If we were, we wouldn't go."

Post used to do what he called "rough necking" in Oklahoma oil fields, and Gatty was an Australian marine navigator.

They've got a great, shiny monoplane on which they pin their confidence of circling the globe in something less than ten days for a record.

Recipes For This Week

(By Betty Barclay)

CHOCOLATE ICE BOX COOKIES

5½ cups special cake flour, sifted.
1 teaspoon soda.
3 eggs, slightly beaten.
1 cup sifted brown sugar.
1 cup granulated sugar.
1½ cups butter or other shortening, melted.
8 squares unweetened chocolate, melted.
4 cups coconut, chopped.
Sift flour once, measure, add soda and sift again. Combine other ingredients in order given and add flour last. Pack tightly in pan, 8x8 inches, lined with waxed paper. Chill overnight. Remove from pan, cut in half, and slice crosswise in thin slices. Bake in hot oven (400 degrees Fahrenheit) 5 minutes. Makes 6 dozen cookies.

RASPBERRY DELIGHT

1 package raspberry flavored gelatin.
1 cup boiling water.
1 cup raspberry juice and cold water.
1 cup canned raspberries, drained. Dissolve gelatin in boiling water. Add raspberry juice and water. Pour ½ into mold. Chill. When slightly thickened, fold in raspberries. Fill mold with remaining gelatin. Chill until firm. Unmold. Serve with sweetened whipped cream, flavored with almond extract. Serves 6.

Persian Balm is a true elixir of youth. Refreshes and rejuvenates. Adds a youthful charm to the complexion. Softens and beautifies the skin. Makes hands flawlessly white. Indispensable to the woman who appreciates subtle distinction. Delightful to use. Delicately fragrant. Soothes dry and irritated skin. Corrects blemishes. A flawless requisite for every discerning woman. A true aid to beauty.

B.C. Apples

Gaining In Popularity In United Kingdom And On the Continent

British Columbia apples are gaining in popularity in the United Kingdom, on the Continent and in other world markets, according to F. Robertson, of R. Robertson Co., Limited, of Vancouver, who made a survey of the situation which included United Kingdom and the continent. He stated that the popularity of B.C. apples is assured in Europe and he looked for steady increase in demand.

A Queer Bargain

Ten thousand cups of coffee was the payment offered by an Italian at the Rovereto, Italy, for a motor car. Payment is to be on the installment system at the convenience of the seller, but the motor car, a small second-hand model, was delivered in exchange for the promissory note. A further term on the note is that the cups of coffee are transferable and the note negotiable.

The use of Miller's Worm Powders causes healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. They sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

Reaction Is Quick

A machine has been developed to test a motorists' reactions to traffic lights. It has been found that the average time between a visual warning and applying the brake is fifteen-hundredths of a second.

Hemp, once a most important fiber for making rope and textiles, has now given place to a great extent to cheaper rival materials.

W. N. U. 1894

The Story Of The Tea Plant

History Points To The Fact That Tea Originally Came From India

There was a Chinaman, we are told, five thousand years ago, penetrated the forests of Assam in India, and discovered the tea-plant. This plant he introduced to his native land.

It is hardly likely that this venture-some, almond-eyed woodsman knew how popular his discovery would be. Probably it appealed to him as a new and hitherto untrodden bush, so he took it back to China, let us say, to plant in his front yard and cause the envy of his next door neighbor.

In spite of this interesting legend the true origin of the tea plant is still unproven. Ancient Chinese authors say the tea plant was growing in China about 2700 B.C. and the Chinese try to show through ancient writings and old legends that China is the original home of this plant.

On the other hand India has a strong claim for the honour as well. The tea plant grows wild in the province of Assam and has more likely flourished over large tracts of primeval country in this province from time immemorial. Since best authorities are agreed that the tea-plant is not indigenous to China we may presume that the story of the Chinese woodsman is rather close to fact and that tea originally came from India.

The tea plant belongs to the Camellia family of vegetation. There are several varieties of plants principal among them being the Assam and the China. The word "Tea" is derived from the Chinese local Amoy dialect word.

Apparently it was the Chinese who discovered that a beverage could be made from the leaves of the tea-plant, for a Chinese author of the fourth century B.C., writes of a beverage that could be produced by steeping the leaves of the tea-plant in hot water.

A later Chinese writer named Cha Pu tells us that tea had been used only for medicinal purposes until the second century A.D. when it came to China during the sixth century A.D. It was not until late in the sixteenth century that Europe began to sample tea.

In the early days of the seventeenth century the product came to Great Britain from China and fetched ten guineas a pound.

In 1664 Queen Catherine, wife of Charles II, received a present of some tea from the English East India Company. She liked it so well she introduced it into Society and it became the fashionable drink. Needless to say only the wealthy could afford to be fashionable.

So far we have spoken of China as a tea producing country.

The history of tea in India is comparatively modern affair. The earliest mention of its being grown there was in 1870, and about that time the famous Indian Viceroy, Warren Hastings, was instrumental in introducing some varieties of the Chinese plant into India. Many years elapsed, however, before any serious effort was made at cultivating it on a larger scale, and it was only when the tea plant was discovered (about 1823) to be an indigenous growth in certain parts of India that any energy was displayed in regard to its cultivation. Shortly after that, the Burmese war broke out, and this, together with other troubles of the British Government in India, militated against any progress in the new industry. It was not, in fact, until near the middle of the century that tea-growing in India was placed on a sound footing.

It is in Ceylon, however, that we find the tea plant reaching its full perfection. The climate of that beautiful island, owing to the heavy rainfall, is pre-eminently suited to the cultivation of tea. After a number of experiments had been successfully conducted, the first plantation was opened in 1867. In that year there was ten acres placed under cultivation. Thirty years later (1897) the acreage under tea, was over 40,000, and about 100 million pounds were exported. Since that time the distinctive quality of Ceylon tea has been gaining greater popularity. This will give some idea of the extraordinary success of the tea industry in Ceylon.

Following are direction for the most satisfactory preparation of tea:

Use—(1) "Saiada."
(2) Fresh water.

(3) An earthenware tea pot. Scald out the pot with boiling water. Use one level teaspoon of tea for every cup desired. Add freshly boiling water, allow to steep about five minutes, then serve.

If the tea is going to stand longer than this it should be poured off the leaves into another heated pot, for it is over-steeping that causes bitterness. Another suggestion is to stir the tea with a spoon before pouring, in order completely to infuse its strength and flavour.

Forced Labor Spreading

Foreign Purchases Help Soviets To Enslave People, Says Durbach Of Atholl

The Duchess of Atholl in an address at London, said there are now several millions of men, women and children performing forced labor in Soviet Russia because of the speed with which the five-year plan is being pushed.

"It is estimated that over five million men were forcibly deported under the February, 1930 decree, chiefly to the forests of the far north of Russia."

"Many of them arrived there in the winter and had no houses until they built them for themselves. History, I think, records no such wholesale uprooting and banishment of peaceful fellow-citizens as this."

She reported that the forced labor, handling the grain and timber and other industries.

"That this enslavement is due to the five-year plan is unquestionable," she concluded. "That the shipping and execution of the plan is being assisted by foreign experts, for sign credits and foreign purchase is further undeniable."

"Canada has taken action to clear herself completely of responsibility in the matter. Are 450 countries such as the United States and Great Britain, both of which have made sacrifices in the past in the name of freedom, satisfied to do less?"

Berlin Opens Skyscraper

Only Eight Stories High But Is Tallest In Europe

Berlin's tallest building "Europa House," has just been officially opened. It is only 180 feet high, with eight stories, but is declared to be the tallest business house in Europe. It contains 30 stories, 450 offices, several large halls, a hotel, a restaurant, a swimming pool and a post office. The roof garden has a dance floor. The building is illuminated at night with neon lights along its front. Express elevators carry 3,000 passengers an hour.

Ship Bees To China

Bees From Alberta To Be Sent In Large Quantities Next Fall

Alberta bees in large quantities are to be shipped to China next fall, according to plans of Geo. Riedell, president of Riedell's Honey, Ltd., Taber, who was in Calgary the other day. Mr. Riedell plans to export his bees to China after the honey season here is over, to take advantage of the recent keen demand in that country, where some 1,500,000 yen is spent annually for bees imported from Japan.

Agricultural Revenue

The gross agricultural revenue of Canada in 1930 is estimated at \$1,240,470,000, of which Ontario accounted for \$421,240,000; Quebec, \$283,236,000; Saskatchewan, \$175,546,000; Alberta, \$150,731,000; Manitoba, \$85,677,000; British Columbia, \$49,300,000; Nova Scotia, \$37,823,000; New Brunswick, \$34,214,000, and Prince Edward Island \$19,701,000.

Labor Minister Seeks

Data On Unemployment

Is Making Survey Of Conditions In Western Canada

A survey of actual unemployment conditions throughout Canada will be conducted personally by Senator G. D. Robertson, Minister of Labor. Because conditions in Western Canada are more acute, he will start investigation there. Upon his return, a similar mission will be undertaken throughout Eastern Canada. A detailed report to the government will climax the coast-to-coast trip.

Accompanying Senator Robertson on his western trip will be the superintendent of unemployment service and the director of unemployment relief. Discussions will be held with provincial governments and representatives of the largest municipalities. In addition, first hand information on rural conditions as they exist at present and as they may exist during the fall and winter, will be secured.

Factories Reopened In Orient

The slump in the price of soy beans in Manchuria has proved a blessing for Japanese and Korean farmers, who are able to afford large quantities of bean cake fertilizer. Demand for fertilizer at the new prices has become so great that many Chinese factories making bean oil and cake have reopened after years of idleness. New factories are being organized.

One of the commonest complaints of infants is worms, and the most effective application of them is Mother Graves' Worm Exterminator.

A Lucky Find

After lying at the side of the road outside her residence at Southwold, England, for four and one-half years, a diamond valued at \$2,500 has just been restored to Mrs. F. Lewis. The gem fell from her ring on August 8, 1926, and a thorough search for it was made at that time. A street sweeper found it among his sweepings, and received \$250 reward.

Excursion Steamer Sinks Off The Coast Of France With Heavy Loss Of Life

St. Nazaire, France.—Nearly 500 excursionists are believed to have lost their lives when the excursion steamer "St. Philbert" sank between St. Gilles Point and Portnic, about five miles from here.

Only eight survivors had been picked up by rescue boats and it was believed that, except for these, all the passengers and crew on the boat were lost.

The excursion steamer was carrying large holiday crowds on its run between Nantes and the island of Noirmoutier. It left Nantes this morning, June 14.

All of the eight who were rescued from the water by boats which put out for the scene shortly after the catastrophe were men. There were a number of women and children aboard the boat.

A squall struck the boat in the late afternoon, the survivors said. It knocked the small steamer over on her beam ends and the crowd becoming panicky, rushed to the opposite side of the deck, causing the boat to capsize and spilling its load of human freight into the churning sea.

The eight survivors were more dead than alive when they were picked up after more than an hour in the heavy seas. They were saved they said, by life belts which they managed to grab before they were thrown into the water.

First information about the catastrophe came from the lighthouse keeper at St. Gilles Point. He saw the small steamer strike and overturn and immediately telephoned Portnic for help. Life savers put off at once for the spot.

Even after the receipt of the news at St. Nazaire, the report that the boat had sunk was discredited here. It was only after the first of the survivors reached the shore that the reality of the catastrophe was accepted.

To Satisfy Dairy Products

Bill To Make Adulteration An Offense

Ottawa, Ont.—Increased penalties for the adulteration of butter and other dairy products will be considered by the agriculture committee of the House of Commons. The House gave second reading, without discussion, to the bill introduced by Samuel Gobeil (Cons. Compt.) which would amend the dairy industries act by putting heavier penalties on those convicted of offenses under the act, and referred it to the agricultural committee.

Altitude Record For Women

Saskatoon, Sask.—Nosing her Gypsy Moth aeroplane to an altitude of 16,000 feet, Miss Nellie Carson, of the Saskatoon Aero Club, created what is believed to be the altitude record for women flyers in Western Canada. The flight occupied an hour and 20 minutes. Miss Carson, who wore winter garments experienced severely cold temperature and she had to be assisted from the machine when it alighted.

Solloway and Mills Are Acquitted On All Fifteen Counts

Toronto, Ont.—I. W. C. Solloway and Harvey Mills were acquitted by an Assize Court jury on 15 charges of theft, laid in connection with operations of the now defunct brokerage house of Solloway, Mills and Company, in which they were partners.

The jury returned their verdict after deliberating for five hours. The trial here lasted for seven days. Solloway seemed on the point of collapse as the verdict was rendered.

Following the discharge by Mr. Justice Garrow of himself and Mills, Solloway told reporters: "I never believed 12 men in Canada could convict us for a third time."

The former brokerage partners were tried and convicted in Alberta in charges arising out of the operation of their business, and faced trial on a previous occasion in Ontario. Proceedings in this province were held up until they had served the jail sentences imposed in Alberta. They also appeared in British Columbia, but were remanded for hearing until after the conclusion of their trial in Ontario.

Reference to the possibility of a trial on charges, of conspiracy in

Gold Strikes In B.C.

Discoveries Are Reported In Two Widely-Separated Districts

Vancouver, B.C.—Reported gold discoveries in two widely-separated districts in British Columbia are attracting wide attention throughout the province.

In the northern part of the province on the Nation River, a tributary of the Fraser River, about 110 miles northwest of Prince George, the reported placer gold discovery has attracted two precious metal seeking parties from Vancouver.

Meanwhile news of a rich ore strike on Lowville, 200 miles north of Ashcroft in the Cariboo, has been brought to Vancouver by four directors of the Cariboo Gold Quartz Company, which for several years has been carrying on development and research work in the neighborhood of Barkerville, where the ore body is known to be approximately twenty-five miles in length.

Dr. W. B. Burnett, of Vancouver, one of the party just returned from Barkerville, said that in the opinion of hard rock men, the strike may well bring on a rush to Cariboo rivaling that of the early sixties.

Girl Bandits In China

Communist Amazons Terrorize Population With Policy Of Robbing With Violence

Shanghai, China.—Activities of girl bandits in various parts of Central China have become so widespread that troops have been sent from Hankow to round them up. The most dangerous of these bandit leaders is Miss Ho Yin, a pretty bob-haired girl, who is believed to be a sister of China's notorious outlaw, Ho Lung.

Educated at the Mission school, Miss Ho Yin heads a desperate band of so-called Communist amazons whose policy is robbery with violence. Firing rifles and revolvers the amazons sweep through a town and half the band holds up the terrified population while the others loot shops and houses, after which they all make their get-away with blood-curdling yells.

Posts Are Abolished

Montreal, Que.—Abolition of five more major positions in the passenger traffic department of the Canadian National Railways together with minor changes and abolition of minor positions, effective on June 15, was announced by R. L. Burnap, traffic-president of the system.

France Opposes Debt Revision

Paris, France.—Recent "steel helmet" manifestations at Brest have made it difficult to continue peace efforts with Germany. Foreign Minister Aristide Briand told the Chamber of Deputies in declaring that the government was opposed to any revision of the Young plan.

Tragedy Of The North

Remains Of John Bennett Sent To England For Burial

Edmonton, Alberta.—The remains of John Noel Patch Bennett, 18-year-old schoolboy who sought experience and found death in the wastes of the Great Prairie, 150 miles west of Grande Prairie, were forwarded to England from Edmonton this week.

Bennett's bleached skeleton, a wolf-gnawed rifle, a pack sack, a diary and a few shreds of the clothing that had been torn from his frozen body by the fangs of wolves that had unearthed it, were discovered by Kelly Sundeman, veteran Hythe guide, who had sought the boy's body for seven months, when he journeyed up Tiltum Creek late in May.

Bennett left his home in Oakdale, Manor Road, Coventry, England, in order that he might gain experience which would school him for a diplomatic career, on which he intended to embark when he attained his majority. He would have inherited a large fortune on his coming of age.

Although warned of the perils of the journey he was about to essay, he set forth from Grande Prairie in October alone with a pack horse, hoping to make his way through Pine Pass to Prince George, British Columbia.

Caught by the winter, his horse abandoned, his moccasins worn out and his food supply exhausted, he struggled on. Finally, with feet and hands frozen by the intense cold of the mountain winter, he could go no further and sank down to die beside the lonely Tiltum Creek, where his body was found this spring.

Statesman Has Hard Task

German Discouraged and Chancellor Finds Troubles Just Commencing

Berlin, Germany.—Chancellor Heinrich Brüning, returning from his visit to London, England, with Foreign Minister Julius Curtius, found his troubles as responsible head of Germany's government only begun.

How to steer a course between the Scylla of a creditor who as yet not ready to reduce Germany's obligations and the Charybdis of a nation sulken and discouraged, and groaning under the weight of the emergency decrees, is something to tax all the ingenuity of this versatile statesman.

On the steamship "Europa," and during a six-hour journey railway from a private car Brüning and Curtius talked with the United States Ambassador to Germany, Frederick M. Sackett, returning after a visit to the United States.

Britain Is Importing Butter From Empire

Answer to Russia's "Five-Year Plan" Says British Member

London, England.—The empire's reply to the Russian five-year plan, is the description Sir William Wyndham, Conservative member of the House of Commons and chairman of the Empire Dairy Council, applies to the increase in imports of empire butter to Great Britain this year.

During the next few weeks no fewer than 46 vessels from New Zealand and Australia will bring more than a million boxes of butter to British ports. Canadian butter is once more entering the British market, too, after being absent for five or six years.

Barley Cargo For Germany

Montreal, Que.—Based upon the average yield of barley per acre, it would take about 22 square miles of wood land to produce the cargo of barley carried from Quebec by the steamer "Emmanuelle Accard," bound for Germany. The vessel carried 566,734 bushels of barley, the largest grain cargo ever to leave the St. Lawrence.

TO FLY OVER PACIFIC

Col. Charles Lindbergh, famous United States flying ace, who won renown by flying solo to France, has now decided to try his luck over the Pacific Ocean. Lindy and his wife, daughter of Ambassador Morrow, will take off this summer for the long flight from the American continent to Japan.

Export Cattle Trade

Assuming Much Larger Proportions Than Was Anticipated

Ottawa, Ont.—The export cattle trade is assuming much larger proportions than was anticipated, with the result that there are numerous western shippers who are unable to book space from Montreal to Great Britain.

These shippers have notified the Federal Government of their difficulties and Hon. Robert Weir is endeavoring to increase the accommodation on ships, particularly for the summer months. He has had most of the heads of the shipping companies at Montreal up to Ottawa to see him and is trying to persuade them to outfit more ships. One of the great difficulties which has to be overcome is that the British Board of Trade regulations announced early in the year and later suspended, are due to come into full effect in September.

These regulations will add much to the cost of equipping ships for the cattle trade, and the shipping companies now hesitate to go ahead on the old basis, fearing that the government will not succeed in having the new regulations further suspended. It seems reasonably certain that, following the withdrawal of these new regulations in toto, the Canadian Government will get a further suspension probably until November 30, but this is not definitely assured as yet.

The question of providing more space is now under the consideration of the shipping companies and a decision will be reached within a week.

Would Fine Issuers Of N.S.F. Cheques

Canadian Credit Men's Association Ask For \$1,000 Penalty

Toronto, Ont.—Legislation to provide a fine of \$1,000 or one year imprisonment for the misdemeanor of passing cheques without sufficient funds was recommended in the report of the legislative and banking committee of the Canadian Credit Men's Association. The committee states a survey covering 549 members during 1930 showed that 68,817 cheques were returned marked "N.S.F.," aggregating in value \$5,106,741.

ENJOYING LIFE AT FAMOUS RESORT

"Just foolin' around and getting tanned," explained the Misses Ena and Brenda Shields of Burnmouth, England, when a photographer at the Banff Springs Hotel made this picture. With their parents, the young Englishwomen have wintered in California and the Hawaiian Islands and are spending the early summer at Banff and Lake Louise before returning east to the Old Country.

Payment In Full Of Old Age Pensions Planned By Ottawa

Barriers On Trade

New Canadian Duties Are Discussed In British House

London, England.—Canada's tariff changes were brought up in the House of Commons recently. Rt. Hon. William Graham, president of the Board of Trade, promised questioners that if further information revealed increases in duties against Great Britain, the government would consider the advisability of representations to the Canadian government.

P. A. Harris, Liberal, asked for particulars of the new Canadian tariff and suggested the president of the Board of Trade should make representations "as to the undesirability of fresh barriers on trade at a time of universal depression."

Rt. Hon. Mr. Graham replied he had not received details of all the recent changes, but they would be published as soon as they were received. The point raised in the second part of the question, he went on, could not usefully be considered in the absence of fuller information than he possessed at present.

Mr. Harris asked if Mr. Graham would make representations if he eventually found that some duties were increased against Britain, and Mr. Graham gave assurance that the question would be fairly considered.

Gandhi Will Go To London

Has Decided To Attend Round Table Conference In Fall

Bombay, India.—Mahatma Gandhi will go to London, England, for the round table conference next fall regardless of the situation regarding the Hindu-Muslim problem, the congress party working committee has decided.

The committee voted a resolution expressing the hope that the communal problem would be settled but asserting that Gandhi's presence in London was essential whether a settlement is reached or not.

Better Understanding

Winnipeg, Man.—"It is vitally important that Canadians establish a greater understanding between industrialists and agriculturists," declared Elmer Davis, past president of the Canadian Manufacturers' Association, here. Mr. Davis is returning to the east following attendance at the annual convention of the manufacturers at Victoria, B.C.

Government Asked To Announce Its Unemployment Policy

Ottawa, Ont.—Suspension of the redemption of Dominion notes in gold was advocated, as an emergency measure, in a sub-amendment to the budget, moved in the House of Commons. Moved by H. E. Spencer, of Battle River, the sub-amendment crystallized the views of U.F.A. and Progressive members in the "ginger group" corner of the chamber.

Miss Agnes MacPhail, of Southeast Grey, was the seconder.

The amendment was coupled with a suggestion by W. A. Neill, independent, Comox-Alberni, that members of the opposition and the independent groups combine with private members on the government side to continue debate until the government announces its policy on unemployment, furnished the highlights of a rather uneventful day.

Mr. Neill demanded that the government bring down a measure of unemployment relief before it was too late for discussion.

"The practice of bringing a measure down only about 24 hours before the close of the session and threatening that if the money is not voted the measure will not be passed, has played out," Mr. Neill warned the government. "That plan worked all right in the short session, but it will not be accepted a second time."

The House now has before it the government motion on which Rt. Hon. R. B. Bennett made his budget speech, the Liberal amendment, and the U.F.A. sub-amendment. There can be no further amendments to the budget.

"Today we have poverty in the midst of plenty," Mr. Spencer declared to the House. "Such new factories as were established in Canada would only serve to make things

Ottawa, Ont.—Payment in full of old age pensions will be brought about as soon as it can be done consistent with sound finance. This declaration was made in the House of Commons by Hon. E. N. Rhodes, Minister of Fisheries in reiterating the pledge of the Conservative party for 100-per-cent payment of old age pensions.

"I am pledged to the payment in full of old age pensions," the former Nova Scotia premier declared. "This government is pledged to payment in full of old age pensions and this party is so pledged. Had times been normal there was no question but that pledge would have been implemented in full at the present session of parliament."

But the Conservative government had bridged one-half of the gap this session and would bridge the remaining portion to bring payment up to 100 per cent "as soon as it can be done consistent with sound finance."

Conservative members applauded the statement. Mr. Rhodes said he felt as Premier Brownlee felt when the Alberta premier made the statement that he had no patience with the argument that payment of 100 per cent old age pensions by the Dominion would be unconstitutional. This was the argument of the Liberal leader (Mr. Mackenzie King) at Saint John, N.B., during the campaign when devoting considerable attention to a speech he (Mr. Rhodes) had made respecting old age pensions.

But following this Saint John speech, Mr. Rhodes continued, Mr. King had proceeded to Charlotte-town. With a Liberal government in office, however, in Prince Edward Island and the province unable to come into the pensions scheme, Mr. King had made a speech in which he had left with the people of Prince Edward Island the impression that the Liberal party would consider the payment of 100% old age pensions.

A board of expert engineers should investigate the whole system of the Canadian National Railways in conjunction with the present management in order to ascertain what lines should be eliminated and also the proper capitalization of the system.

This suggestion was made by G. B. Nicholson, (Cons., Algoma) speaking in the budget in the House of Commons.

worse by adding to the glut of commodities which people could not buy. "I am quite sure that the system of protection, which is the policy of the government, will never be a solution for unemployment," he continued.

Neither did he think free trade was a solution for this problem, but he did think "that the greater the freedom of trade, either between province and province or internationally, the better for all concerned."

Criticism of the coal policy outlined by the government was voiced by Mr. Neill. The coal industry had received a measure of assistance "if a measure which with one hand gives a dollar and with the other takes away 90 cents, can be called assistance," he asserted. British Columbia would receive only 1.7 cents a ton by way of assistance as a result of the measures, he claimed.

A suggestion that all parties in the Commons should pull together during the present hard times came from R. C. Matthews, Conservative member for Toronto East Centre. He found little criticism of the new tax proposal throughout the country.

Disaster would follow continuation in the present fiscal policy, in the opinion of Hon. Charles Marcell, veteran Liberal member for Bonaventure. He counselled adoption of a moderate policy which treated other countries as Canada would herself wish to be treated.

James L. Bowman, Conservative member for Dauphin, followed with a defence of the budget and a denial that it was designed to benefit the rich.

Suggests Combining Scout Forces For Annual Camp

A joint camp of Boy Scouts from Michel, Coleman, Blairmore, Bellevue and Hillcrest will be discussed next week at a meeting of local committees. It has been suggested that the camp be held at Waterton Lakes Park during the last two weeks of July. The combined troops of these five towns would total about 80 boys and officers.

Rev. Mr. McMorine, scout master of Michel troop, was in Coleman on Thursday discussing the proposal with Scout officials on Thursday. Mr. Westrup of Hillcrest stated he would announce the date of the meeting.

NOTES AND COMMENTS

"When a fellow needs a friend" is an expression all are familiar with, and about one case in a hundred the friend will stand by to help. Get into a tight pinch and fair-weather friends vanish as quickly as the morning mist before the rising sun. The best friend one can have is his own "guts" to see a thing through to the bitter or glorious end when he is up against hard going.

Coleman does not get credit for its population in the census reports. Figures on its population vary in directories from 1700 to 3500, according to the territory included. East Coleman, Graftontown and Carbondale rightly should be included as Coleman population, for the people living there obtain mail at Coleman post-office. An effort will be made on the completion of the present census to show that Coleman is credited right in population figures. Headquarters of two important coal companies, a postal revenue for 1930 larger than any town from Lethbridge west, and a school attendance of 600, indicates a town of some importance in southern Alberta. And it can be made a centre of much more activity if pep and energy were generated by business men. Towns grow into cities by co-operative effort of energetic and far-visioned citizens.

This should be a logical centre for generating power. Hundreds of thousands of tons of coal are shipped out annually, for railroads, industrial plants and other purposes. In the course of time power will be generated at a source where it can be generated the cheapest, and manufacturers will also locate where they can manufacture on the cheapest basis. The sceptical will say this is a dream. Many a dream has been made to come true, and competitive conditions and economic needs will make this dream come true. Nothing remains stable. 25 or 50 years hence may see a great change in the industrial map of Alberta, and districts which are sources of cheap power will play a prominent part in the change.

"All work and no play makes Jack a dull boy." Mix some play in each day and work will seem easier. Some become so absorbed in work and the worries attached thereto that they cannot bring themselves into a receptive mood to take part in games. The story of the man who became wealthy, and whose ambition had been to amass sufficient that he could enjoy leisure, has often been quoted. He found that he had become too old to learn how to enjoy or make use of leisure hours.

On the other hand, some men are so constituted that work is their sole hobby, and they seek no other diversion. To the average man recreation in various forms is a tonic and a valuable conservator of health. Usually difficulties are more easily conquered by those who have learned to "play the game."

When one reads of the resolutions passed at conventions and forwarded to the government, Federal or provincial, he concludes that there must be a fearful stack of them. The wonder is that so many receive attention from the thousands that reach the government during a year. Of resolutions affecting trade and commerce, especially following a new budget announcement, there must be sufficient to keep cabinet ministers pondering day and night. Added to these are thousands of resolutions, from urging the adoption of a new Canadian flag to abolishing the Canadian Navy (if there is one) and resolutions on many other things that would turn a minister's hair grey if he tried to satisfy all.

Wherever there are people, there's life. And where there's life, there's business. The more activity, the more business. Create activity, business follows. Busy people attract business.

Ministers find it difficult to draw more than a handful to

services in the summer. Why not take the services to the people? Hold them in the open air where people congregate. Combat indifference by aggressive action. Use the bandstand in the park. Even those who prefer to play tennis during church hours might find it interesting. It would meet the objection of those whose reason for not attending in the summer time is because they wait fresh air.

Sermons on which ministers expend much thought often do not reach the people for whom they are intended. It is the great majority who are indifferent, who will not come to church, who should be listening. The only way to reach them is to preach to them in places where they congregate, on a soap box on the corner if needs be. Adopt the same aggressive tactics as the Communist leaders. Men who are sincere in the Christian belief should rally to support any minister who has the courage to go out on the street corner and meet the challenge of Communism and its atheistic teachings.

Better to be a community, busy-body than a mere drone on the activities of those who aside from business try to make a town worth-while. 'Tis better to be a booster than an oyster.

Every local merchant can do as the mail order and chain stores are doing, send out circulars to customers and those whom they would like as customers. Arrange with The Journal office to have this complete service attended to each week. Meet the mail-order house on its own battleground, through your local post-office and your local printing office.

Spirit Of Nationalism Is Largely Responsible For World Depression Says Sir George Paish

Sir George Paish, formerly editor of the London Statist and one of Great Britain's most distinguished economists, is in the United States holding conferences with leading statesmen, business men, and bankers. He sets forth in an interview in Barron's Weekly his views as to the causes for the depression and the remedies to be applied in curing the business depression now prevailing in this country and the world at large. He is genuinely alarmed over the outlook, and states that the spirit of nationalism in the United States and Europe is responsible for the depression and that it is forcing the world into bankruptcy. In his interview he says:

"Without desiring to be severe, I am compelled by the facts of the situation to state, and to state definitely, that the spirit of nationalism in the United States is in no small degree responsible for world trade depression, as well as for the depression in the United States, and that unless this spirit is changed, both in the United States and in other countries, from that of nationalism to what I may term universalism, that is, the spirit which promotes a policy beneficial to all nations, any remedy of the present situation cannot be found."

"The distress in the United States and elsewhere today must inevitably increase until there is a real danger of both a trade and a credit breakdown. The policy that is being pursued, not only in America but also in Europe and in other countries, is forcing the world into bankruptcy and with it into revolution. It is impossible to survey the political conditions now prevailing in the world without a feeling of great anxiety. Already, many revolutions have taken place in South America and a good many in Europe, and others will undoubtedly take place if this policy is persisted in."

"The remedy is not an effort to be more self-contained, not an effort by each nation to do without the rest of the world, but an increasing tendency towards co-operation with other nations in the interest of the common well-being."

"Possibly in ancient times there was something to be said for the policy now being pursued by the racial spirit was so strong and nations were in process of formation, but in these days, when the world has become an economic unit and each nation has for a long time past been bringing its contribution to the common well-being, it is not only folly but also criminal for nations to seek to go back to the policy that was suitable to primitive conditions. If pursued in, it will bring us to a condition of distress without parallel."

"The only possible policy that will carry the nations out of their present troubles into a new and greater spirit of prosperity is a policy of collaboration and co-operation which will make the whole world still more efficient as an economic unit, which will expand the productive power of all countries, which will expand the trade of all countries, and which will bring universal prosperity."

"The effort to go back to the old conditions has already brought great suffering, and the continuance of this effort will intensify this suffering in a manner that no reasonable being desires to contemplate."

"The immediate outlook is most disturbing, and it is evident that constructive measures for the rehabilitation of the prosperity of all nations must be taken without delay if disaster is to be averted."

Travel Far To Take Job

To work for six months on a new \$2,500,000 hotel being built at Bermuda six sisters and 100 other skilled workers recently sailed nearly 3,000 miles from Liverpool, England. This party of workers brings the total number of English craftsmen making the voyage to 325. The hotel is being built by a British concern.

Don't drop insulations. A bigger man may pick them up.

More Canadian Cattle Shipped To Britain

Seventh Load From Western Ranches Since Last October

Twenty-seven cars of pure-bred cattle, comprising 550 head, left Winnipeg on a special Canadian Pacific train bound for the seaboard and thence to British markets.

This is the seventh shipment of the kind from western Canadian ranches since last October. An experiment which is meeting with practical success in both Canada and the British Isles covers the feeding of these cattle largely upon the residue of the sugar beet product and the sale of Canadian meat in the Old Country. October, November, April and May have seen large exports of stock, chiefly from southern Alberta, travelling eastward in the process of this new agricultural business venture between Canada and the Mother Country.

This shipment comes largely from Pat Burns' ranch at Calgary, and is accompanied by Harry Chapman, of Calgary. After resting and feeding a day in Winnipeg, the train proceeded to Montreal, making only one stop before arriving to be loaded on the S.S. Salscia.

Alberta Coal

Production For Season Is Regarded As Favorable

Alberta mines produced 387,449 tons of coal during the month of March, compared with 399,585 tons in the corresponding month of last year. Considering the mildness of the weather which has affected the consumption of fuel, the production is regarded as favorable. The Edmonton mines produced 39,610 tons, and the Drumheller mines 91,361 tons.

SMART JUMPER DRESS THE LITTLE CHIC PARISIENNES ARE WEARING

Today's chic dress style is quite individual.

The tiny French bodice is designed with open "V" at the front and at the back. The skirt is comfortably full to allow sufficient freedom that small folk need for playtime. Joined to the yoked bodice in soft gathered treatment gives a very dainty effect. The guimpe is fetching with Peter Pan collar and turn-back sleeve cuffs. When the warm weather arrives, the little guimpe may be discarded.

This sturdy bloomer dress in baby blue and white gingham check uses white batiste for the guimpe.

Style No. 211 is designed for tots of 2, 4 and 6 years.

Dimity prints, cotton broadcloth prints, linen, pique, percales and wool jersey make up nicely and are practical as well.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

B.C. Lumber Industry

Large Orders From Australia and British Mark Beginning Of New Era

British Columbia's lumber industry, backbone of its whole business life, started to swing back towards prosperity recently with the placing of orders for 4,000,000 ft. of mining timbers for Australia and 1,500,000 railway crossing timbers for England.

In announcing receipt of these orders by British Columbia mills, Hon. N. S. Longhead, minister of lands, declared it was the best business news British Columbia had heard since the start of the industrial depression.

"The lumber industry, as it well may be, is jubilant," he said, "for this, it is believed, marks the swing of the pendulum upwards. And I can say without going further at this time that it will probably be the forerunner of other large orders. It looks as if the lumber business had reached bottom and was going to climb upwards again in a way which seemed impossible a short time ago. This same situation occurred in 1918, when a big order for lumber from England started the wheels to turn in our mills once more."

Comparing Present With Past

World Changes Many Of Its Beliefs During Progress Of Years

News from Lisbon of sharp earthquake shocks recently recalls the great Lisbon earthquake of 1755, one of the greatest seismic disasters in history.

But to those who like to compare the present with the past to the present's advantage it will also recall the prevailing belief 176 years ago that the Lisbon earthquake was a visitation of God. There was some preaching in this country to similar effect when a storm swept out of the Caribbean a few years ago and devastated Southern Florida. But even intellectuals of 1755 like Voltaire were inclined to see God's hand in the earthquake and tidal wave that destroyed 50,000 lives in the Portuguese capital.

The world changes many of its beliefs in a century and three-quarters. If what we like to call twentieth century knowledge smiles patronizingly at eighteenth century ignorance, what will be the attitude of the future of 176 years to the present whose theories as to the causes of earthquakes are still as vague as superstitions themselves.

People Should Use Eggs

One Of Most Valuable Foods and Price Is Low

People who have families to feed and who must count the cost of every thing they buy are foolish if they do not make a full use of eggs and butter these days. Word comes from Toronto, however, that people are not buying as many eggs as when they were double or treble the price. An egg, so long as it is fresh, is just as good at a cent as one at five cents. People who are not thrifty enough to take advantage of the present low prices are not good managers. Butter, milk and eggs, the three most valuable foods obtainable are now procurable at lower prices than for years.

Work Tests For Idle

Enforcement of work tests before relief would be granted and a uniform system of registering unemployed were approved by the Regina City Council at a recent meeting, when proposals arising from the conference between representatives of Regina, Saskatoon, Moose Jaw and Prince Albert and the government last week, were discussed. They will be put into effect immediately.

London may ban smoking in theatres.

Europe is spending \$2,600,000,000 a year on military preparations.

NEW HEADS OF 'CANADIAN MANUFACTURERS' ASSOCIATION

William H. Miner (right), and William C. Coulter (left), elected President and First Vice-President, respectively, of the Canadian Manufacturers' Association at the annual convention in Victoria, British Columbia.

Soviets Buying Farm Products In Advance

Have Contracted With Peasants For Output Of 225 Millions Acres

Expanding its policy of buying farm products in advance from individual peasants and collectivized farms, the Soviet Union is this year signing contracts for the crops on 225,000,000 acres.

More than half of these purchases are of grain and already more than 80 per cent. of the agreements for the cereal output of 125,000,000 acres have been signed.

The program calls for advance purchase of 5,400,000 acres of cotton, 3,000,000 acres of sugar beets, 7,500,000 of hemp and flax, 460,000 of tobacco, and considerable areas devoted to soy beans and sunflower seeds which are cultivated for their vegetable oils.

The government furnishes mineral fertilizers, farm implements, expert agricultural advice and supervision selected seed grains to peasants who sign contracts. There also are some advance cash payments which have been estimated for the year at about \$172,500,000, an average of about 75 cents an acre.

The peasant's final return for his labor depends then upon the quality of the farming that he does. If he gets a crop of better than average quality, he sells it to the government after harvest at a premium over the "run of mine" prices paid for farm products. If he lies down on the job he is out of luck.

Information Not Available

And Question Whether Scotsmen Kiss Is Still Unanswered

Do Scotsmen kiss? That is the question which was raised in a speech of promise case when it was asserted that people north of the Tweed do not believe in kissing. So surprising a statement must not pass without investigation, so I asked several Scotsmen about it. It was not difficult to find them—one has only to shout "Mac!" in Fleet Street to collect dozens.

The first was most unsatisfactory. He was a little deaf, and said "Yes," he believed in kissing women. So I tried another who, with proverbial caniness, said it depended on the woman. Another Scot was "all for it" while a fourth advised me to try it for myself. I must one of these days. The answers, though inconclusive, proved one thing—that it is as futile to generalize about the Scots as it is to generalize about other nations—London Sunday Pictorial.

May Follow Short Route

Lindbergh Likely To Fly East On Trip To Orient

The New York Times says Colonel Charles A. Lindbergh and his wife on their proposed flight to China and Japan may fly east instead of west on a course across Greenland and Spitzbergen, through Siberia and thence to China.

The great circle route, the shortest possible distance to Peking from New York flying eastward, would bring them close to the north pole, but the route would touch points which might be considered as fuel and supply bases.

When asked concerning this route, Colonel Lindbergh said his plans were not complete, but that several courses were being considered.

Out Of Balance

Canada is vast enough to feed all her children. If she is not successful at the moment it is because her population is badly distributed. Too dense in the towns, it is too sparsely populated in the country districts. Every effort made to re-establish the balance should meet with encouragement.

It may not be proper to precede the rather of your best girl downstairs—but sometimes it is policy.

Canada's National Parks Are Becoming Important Factors In Dominion's Tourist Industry

Experiment Again A Success

Astronomical Society Proves Earth Revolves On Its Axis

An experiment to prove by means of a pendulum that the earth rotates on its axis was successfully repeated by the Argentine Astronomical Society at Buenos Aires recently. The society employed the method used by Jean Foucault when he performed the same experiment for the first time eighty years ago, and the same results were obtained.

As long ago as 305 B.C. Heracleides of Pontus taught that the earth turned on its axis. But it was generally thought, even through the Middle Ages, that the earth was stationary, and that the heavens revolved around it. Though the revolutionary work of Copernicus in the sixteenth century made this belief in an unmovable earth improbable, it was not until 1851 that Foucault was able to show that the earth actually rotates on its axis. His contention has since been verified by other experimental methods.

From the dome of the Pantheon at Paris, Foucault suspended a heavy iron ball by a wire about two hundred feet long. A pin attached to the bottom of the ball touched a layer of sand spread on a table below. Thus the movement of the pendulum was traced by the pin on the layer of sand.

Having arranged these matters to his satisfaction, Foucault held the pendulum stationary by means of a cotton cord for several hours, or until the pendulum had become absolutely still. Then the cotton cord was burned in order to start the ball swinging without any jar. It was observed that, with each vibration, the pin cut the sand at a different place, instead of drawing only one line, as would have happened if the earth were not rotating. The pin shifted to the right at such a rate that a complete rotation would have been made in thirty-two hours if the pendulum had not come to rest.

British Admiralty Holds

Navies Are Essential

Sir Roger Keyes Believes In Force Behind Treaties

Reduction of the strength of the British navy as a step toward peace was described as "blind folly" by the famous British sailor, Admiral of the Fleet Sir Roger Keyes in a speech before the annual dinner of the National Association of Head Teachers.

"There are some people who seem to think that leagues, pacts, and treaties can take the place of armaments and will eliminate war," said the Admiral, who is commander-in-chief of the Portsmouth naval station. "Such agreements are a delayed action fuse in the circuit of international relations and justify some reduction of armaments, but to trust to paper pacts without a force behind them would be analogous to trusting our laws without police to enforce them."

"Our sea communications are as vital to us as the air we breathe, yet every reduction of our navy is hailed by those to whom I have just referred by others who really know better as another step toward perpetual peace."

"What blind folly it all is!" Admiral Keyes commanded the Dover patrol during the Great War, directed the naval operations of Zebrugges April 23, 1918, and later was commander-in-chief of the British Mediterranean fleet.

A Sensible Question

Little Willie came home in a sad state. He had a black eye and numerous scratches and contusions and his clothes were a sight. His mother was horrified at the spectacle presented by her darling. There were tears in her eyes as she addressed him rebukingly:

"Oh, Willie, Willie! How often have I told you not to play with that naughty Dick boy?"

Little Willie regarded his mother with an expression of deepest disgust. "Say, ma," he objected, "do I look as if I had been playing with anybody?"

New Word Not Needed

The story is told of two bishops known to each other as Bill and William in their exceedingly friendly relationship. One day William wrote to Bill in a burst of enthusiasm: "Dear Bill—I have found a new word. And Bill replied: Dear William—You do not need any new words; what you need is a new idea."

Canada's national parks are from year to year becoming greater factors in the rise of the Dominion's tourist industry. The attraction and entertainment of the thousands of visitors who are annually taking to the roads and trails of this continent is rapidly becoming in Canada an industry of national importance. Areas of great natural beauty are being more and more sought and the army of vacationists upon whom the great outdoors has cast its beneficent spell continues to grow.

The far reaching importance of the national parks in increasing the flow of tourists to the Dominion is shown by the growing number who annually visit these great scenic playgrounds. Last year half a million people flocked by rail, motor, and boat to the parks. Both those in the West and those in the East were well patronized, the total being 544,350 visitors. Banff Park attracted the greatest number, 188,443 visiting the famous Alberta resort Jasper Park drew 13,783 persons; Kootenay Park, 43,125; Waterton Lakes Park, 44,827; Buffalo Park, 12,537; Elk Island Park, 30,128; and Glacier, Revelstoke, and Yoho Parks combined had a total of almost 30,000.

Prince Albert National Park, Saskatchewan's unit in the Parks' system, recorded a considerable increase in number of visitors last year, the 1930 total reaching 17,164, or 7,000 more than the previous year. In the first year of its existence, Riding Mountain National Park in Manitoba, entertained 15,028 persons.

In the East, national parks and recreational areas also attracted increasing numbers. Point Pelee Park, the most southerly point in Canada, and the St. Lawrence Islands Parks, both in Ontario, reported higher totals. Point Pelee had 104,000 visitors last season and the Islands Parks drew 15,000. The historic parks, Fort Anne in Nova Scotia, and Fort Beaujeu in New Brunswick, had 18,000 and 12,000 visitors respectively.

Indications for the present season point to another large influx of visitors to the national parks and surrounding areas. Numerous requests for information are being received in the Department of the Interior. Of special interest is the fact that the 1931 annual camp of the Alpine Club of Canada will be held in Prospectors Valley in the shadow of the Ten Peaks in Banff Park.

Alberta Creameries

Cream Receipts In Alberta Are Reported On The Up-Grade

Cream receipts in Alberta creameries continue on the up-grade with 1,642,057 pounds of butterfat recorded for the five-week period ending May 2nd, an increase of 80.7 per cent. over April last year, according to Dr. C. P. Maxwell, dairy commissioner. The central section of the province made a gain of 92.3 per cent. for 1931 during the first 18 weeks. The average test in 1931 was 32.4, a gain over the 31.3 mark of a year ago. The main volume of cream has shown better quality as 62.4 per cent. graded "special." Total cream receipts in 1931 reached 4,503,229 pounds of butterfat.

Vegetable Cannery

A vegetable cannery, which it is reported, will be the largest in the British Empire, is to be established in Essex County, Ontario, at a cost estimated at \$1,500,000. The district in which this new cannery is to be built is one of the most productive in North America.

Private hoarding of funds has been condemned by the Portuguese government.

It is strange how a man will chase a girl until she catches him.

"How did you manage to cut out a lock of Miss Frieda's hair without her noticing it?"

"It slipped off when she had gone out, sir."—Kasper, Stockholm.

Theatrical Manager: "What's your line?"
Applicant: "Obey anything in the line of tragedy."
Theatrical Manager: "H'm. Well, let's see what you can do. Make me sob like a child.—London Opinion.

WORLD HAPPENINGS BRIEFLY TOLD

As a result of a recent change in its postal service, Poland now has a post office for every 8,900 inhabitants.

The Central Bank of Shanghai recently shipped gold bars to the value of \$5,100,000 to Vancouver on the "Empress of Asia."

The Irish Free State Government rejected a proposal for establishment of a gambling casino at Bray, a seaside resort in County Wicklow.

Thirty-one French war veterans recently spent four days in London as guests of the British Legion, which has made them honorary members for their services in connection with Legion pilgrimages.

The international radio conference in Copenhagen, Denmark, at which about 40 nations were represented, ended June 9. A number of proposals were drafted for submission to the world congress, which is slated to be held in Madrid in 1932.

Delegates in Toronto to the World's Women's Christian Temperance Convention will carry home with them to the four corners of the earth unique souvenirs in the shape of small phials full of hard wheat from Alberta.

Economic indignation was put forth as one of the "main contributing causes of the business ailments" affecting the United States in the "world wide epidemic of trade depression" by Senator Davis, of Pennsylvania.

Charles Lindbergh, second Viscount Halifax, celebrated his 92nd birthday anniversary recently. He is probably the proudest father in Great Britain, for his only son is Lord Irwin, who recently retired from the high post of viceroy of India.

In behalf of enthusiasts of Charles Dickens in Toronto and Boston, wreaths were laid on the novelist's grave in Westminster Abbey, June 9, to commemorate the 61st anniversary of his death. The wreaths were composed of scarlet geraniums, Dickens' favorite flower.

Believes Wars Are Inevitable

British Scientist Says Mother Nature Uses Wars For Pruning Hook

Man's dream of a world without war can never come true, Sir Arthur Keith, the British scientist, said in an address at Aberdeen University where he is the rector.

"Nature keeps her human orchard healthy by pruning," he said, "and war is her pruning hook. We cannot dispense with her services."

That "harsh and repugnant" assertion was wrong from him, he said, even though the future of his own dreams is a time of everlasting peace.

In the electric lighting industry the plant comes before the bulb, but in gardening the bulb comes before the plant.

"No, I shall never forget the date of my husband's death. It was either 1910 or 1911."—Moustique, Charleroi.

Ship Model Breasts Man-Made Wind and Wave

Ingenious Tank Experiments Made With New Camdar Model

In an effort to make the new super-Camdar as near fool-proof as human ingenuity and modern marine science can make her, the most extraordinary preliminary tests have just been completed with an exact replica model of the ship.

These tests made with the utmost care, were performed with an 18-foot model in a 300-foot tank in which miniature gales and heavy seas were mechanically created to reproduce actual conditions on the Atlantic which the great liner will have to face at all seasons of the year. These tank trials are a combination of years of minute experiments made with models.

The designers are convinced that the new ship will prove to be the most perfect vessel possible for the work she is intended to perform. The tank wave-making apparatus consists of a rocking diaphragm of wood stiffened with steel angles and plates. This is mounted on wheels which might be called the stopping end of the tank, and end towards which the models run in the experiments. The rocking-point of the diaphragm is placed two feet below the water level of the tank and the rocking is caused by a driving-gear through a flywheel and long connecting rod.

Variations in the motion of the diaphragm govern the number of waves generated, their length and speed. The waves travel steadily and uniformly along the whole length of the tank with crests square to it, and through which the model passes in the opposite direction in each experiment. The capacity of the wave-generating permits reproduction to scale of storm conditions, of wave-length and height in the North Atlantic corresponding to a gale of about 60 knots. The sea condition of the ship, which is represented by these experiments in artificial waves, is that of steaming against a very regular head-on sea.

In order to study the behaviour of the vessel in wind-storms, ingenious methods are used to reproduce actual conditions in miniature. A model of the ship made to scale, fitted complete with superstructure, funnels, masts, masts, boats, etc., is placed inside a tunnel built of plywood and having an observation window of plate-glass extending along the front of the tunnel. Both ends of the tunnel are open and to one end is attached a large suction fan capable of drawing air through the tunnel over a wide range of air speed. At the other end of the tunnel is fixed a large sheet metal bell-mouth and grid for steady and equalizing the velocity over the area of the tunnel.

Two smaller fans are placed in the back of the tunnel. One is connected to a metal box containing sal-ammoniac crystals, and thence through a trunking to the funnel. The other fan drives off white fumes or smoke. The blast from the fan carries this smoke up and out through the funnels. The speed of this fan can be varied to represent the proportionate strength of the funnel gases as in the ship. The other fan is connected to all the ventilators by an intricate manifold trunk and draws air down through all the ventilators, again reproducing actual ship conditions.

When all the fans are in operation the model faces a head-on wind, the smoke streams out of the funnel and follows the paths of the induced air currents adjacent to the funnels, the ventilators draw down their supply of air. Thus in miniature, the vessel is subjected to the behaviour of the smoke under any number of combinations of wind speeds, funnel gas speeds, ventilation speeds, with various types and proportions of funnels. By experiment with these combinations, and by a process of elimination, designers arrive at the type of funnel or set of funnels which will result in the least possible contamination of decks and ventilation on the new giant Camdar.

Platinum Output Larger

Figures Show Vast Increase Over the 1929 Production

Canada's output of metals of the platinum group during 1930 totalled 68,116 fine ounces, a vast increase over the 28,837 fine ounces produced in 1929, it is revealed by finally revised figures released at the Dominion Bureau of Statistics. Platinum, rhodium and other metals are included in the group. Last year's production was worth \$2,559,128 as against the 1929 production value of \$1,656,045.

Platinum exported by Canada during 1930 totalled \$1,628,598 in value, more than seven times the figures for 1929 exports.

X-ray examinations of Egyptian mummies at the Field Museum show that pyorrhea was a prevalent dental disease in ancient Egypt.

Vital Statistics

Eighth Annual Report Covering the Year 1928 Has Just Been Issued

The Dominion Bureau of Statistics has just issued the eighth annual report of Vital Statistics covering the year 1928. Although the more important figures for that year were given out in 1929 in preliminary form, the present volume, which contains detailed analysis for permanent record, has many features of great interest.

The report contains tables classifying the parents of children born during the year, under such headings as age, racial origin and birthplace. Tables of decedents are presented under similar headings, and special attention is given to treatment of causes of death according to age, nativity and conjugal condition, while the occupation of the decedent is tabulated for certain causes. Marriages are classified according to ages, birthplaces and religions of the contracting parties. Statistics of births, deaths and marriages are also given in detail by localities. The report contains special tables for the Indian population and for the Yukon and the North West Territories.

A very full analytical introduction is included in the volume.

Great Lakes' Level

Exceptionally Low

Will Hamper Fall Grain Movement

Movement of the grain crop down the Great Lakes will be considerably hampered next fall unless this summer sees an excessive rainfall throughout Ontario, Manitoba and middle western United States.

Surveys of the conditions, which hydrographic experts in the Department of Marine at Ottawa are irrefutably following a check-up of the water levels of the Great Lakes and the St. Lawrence River. Figures gathered by the department show that the levels are far below the average for this time of year.

Yukon Executive Retired

Major Burwash Succeeds To Office

Made Vancouver, B.C., former gold commissioner and chief executive officer of the Yukon, and since 1925 executive in charge of the Arctic exploration and development work for the Yukon and North West Territories branch of the Department of the Interior, was retired from the civil service recently.

Major Lockie T. Burwash, investigator for the same branch, and one of Canada's outstanding Arctic explorers, was appointed to the office. Mr. Mackenzie's retirement is part of the cutting down programme of the interior department staff.

Soviet School in London

A Soviet school with Russian teachers has been opened at a club in London, England, for children of the club's members, who are Soviet employees in the city. There are 20 pupils, who are taught the usual subjects, and both English and Russian, but not religion.

The ADVENTURES OF CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE: As Captain Jimmy and his new found friend Jed Stone were away from the Chinese bandits in an old railway locomotive, Jed Stone's brother had been captured by outlaws, and of his vain search.

As Jed told me the story of how his brother had suddenly threatened the bandit chief and how they had carried him away into the hills in revenge, it suddenly occurred to me that these outlaws were the same band who had had recently escaped.

We were so interested in our plans for getting him free, that I failed to notice another train rounding the curve, until its whistle shrieked a warning. To make matters worse, we were backing up, instead of running forward, and our engine or freight cars would soon be crushed to wreckage between the heavy locomotives.

I switched to full speed ahead in hope that could lead us to safety. The wheels spun and hissed, and it seemed that our locomotive must jump the track.

"Too late!" There was an ear-splitting crash and it just felt as if some big giant had kicked me from under. The engine lurched forward, and the next two were smashed to bits. The engine itself, after causing all that trouble on its side in the ditch station, and now lay upside down.

The tracks looked as if a cyclone had just passed by. Rails were torn up, and the country was flat and uninteresting. Most of the timber had been cut away years before, and the ground almost bare.

New Experimental Farm

Will Serve Large Area Of Three Million Acres In Southern

The new experimental farm of the Dominion Government located two miles south of Regina and a mile east of No. 6 Highway, which recently opened, will serve the Regina-Moose Jaw-Weyburn area which comprises some 3,000,000 acres of heavy clay soil. Soil drifting will be one of the problems to be investigated at the farm, also weed control, comparisons of different methods of summer-fallow land for seeding, preparing stubble land for crop, the economic value of forage crops and their relation to the general problems and intensive studies of weeds prevalent in this area.

Army Of School Teachers

There were 9,640 students training as teachers in the 46 normal schools and in 12 of the universities in Canada in 1930. About 70,000 men and women are annually employed as teachers in the schools of Canada.

Between 1920 and 1930 as many as 170 disputes which might have developed into wars were settled by arbitration.

The average man is like a match. If he gets lit up, he loses his head.

Claim 'Plane Speed

Record Exceeded

Trial Flights Of Schneider Cup Pilots Were Speedy

The world's airplane speed record of 357 miles an hour, made by Squadron Leader August H. Orlebar in 1929 was reported to have been broken several times by pilots in training for the Schneider Cup races.

While the figures have not been given out, it was understood pilots exceeded 360 miles an hour while driving racing seaplanes in trial flights.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Christianity vs. Communism

(Continued from Page One)

its principles before the masses? If it does not, in fifteen years we will have no church."

"The Communists have the courage of their convictions; they mount platforms at street corners and are aggressive, therefore the church needs men to be as aggressive in going among men building up the kingdom of Christ."

"Less whist and more witfol ness; less bridge and more church were needed to bring people to Christ and the influences of Christianity."

Mr. Larke urged every man who believes in maintaining the forces of Christianity against Communism to lose no opportunity in combatting its pernicious influence on the social and spiritual life of the nation.

Personal and Local

Hillcrest and Bellevue will combine forces and will play matches against Coleman tennis club on Sunday.

Enthusiasm, energy and a lively interest in things about you helps in making life happier for everybody.

Mrs. Sidney Whits of High River, has been spending several weeks with her parents, Mr. and Mrs. George Odell.

Lightning played hob with the electric transmission lines on Tuesday when electrical storms continued intermittently during the afternoon and evening.

Your attention is called to the advertisement of Chas. Nicholas for new frocks for ladies and girls, in colorful fabrics of the latest design. You will be delighted with their new assortment.

A number of school friends of Margaret and Jean Robert gave them a surprise party on June 8, their birthdays. Cards were played, and a pleasant hour or so was spent in dancing.

Bud Clarke and B. Eyesacker motored to Banff last week, returning Monday night. They made the trip from Banff to Coleman in 8 1/2 hours running time, the highway being in excellent condition.

Mr. Melville Anderson, of Anderson & McLean, sight specialists, of Calgary, announces next visit to G. R. Powell's, Coleman, Tuesday, June 30th. 20 years experience and regular visits assures you of satisfaction in all optical work.

Arthur E. Graham, worshipful master of Summit Lodge A. F. & A. M., attended the annual communication of the Grand Lodge of Alberta held last week in Edmonton. G. Cruickshank, M. L. A., of Hillcrest, a past grand master, attended, with many other important officers of the craft in Alberta.

Dr. R. T. Ross and son Douglas spent the week-end visiting Mr. and Mrs. J. O. C. McDonald. He lived here as mine union surgeon some years ago, and now lives at Drumheller. He was on his way to the coast to spend a holiday, and to attend the convention of the Canadian Medical Association.

Jas. Ford, town clerk, dug a trench around the town hall on Tuesday afternoon to keep the flood from his office. He was digging as quickly as a badger seeking cover, but the water gained on him so quickly that he called the men from the gravel pit nearby to reinforce his efforts. He had donned a fireman's coat and helmet, and at first glance one imagined the war was still on.

\$56 was distributed to families (through orders given to local stores) by the General relief fund committee last week. However this was not sufficient to cover the needs brought to the attention of the committee, so a whist drive and dance will be held in the K. of P. hall on Wed., June 24th, instead of the New Coleman Hotel dining room as formerly announced. The admission is 50c each, including lunch served in the Coleman Cafe. Prizes for the whist drive and favors for the dance promises a good time for everyone. Keep this date, Wed., June 24th open and by attending help someone who is less fortunate than you are. Net proceeds entirely for charity.

"SUNRISE" BREAD

Tell your grocer you want "SUNRISE" when ordering bread

F. A. Hart, Manager

Engaged in a price war, the proprietors of six barber shops at Salem, W. V., reduced the price of a hair cut to ten cents. One barber said he would cut his customers' hair free, and a competitor said if that happened he would cut hair free and throw in a shave and tonic or anything else the customer wanted.

The dancing pavilion at Cowe Nest Lake, operated by A. Morancy, was opened on Saturday night and a large number of people gathered. Mr. Morancy has on the lake a 10 passenger gasoline boat, which makes a 9-mile trip around the lake, passing the cave, where the water thunders from the cavern in the mountain in the lake.
